

## **JOB DESCRIPTION - Mid Level Full Stack Developer - £30k-£35k - Birmingham, West Midlands UK**

**\*\* Javascript, Meteor, Mongo, Linux, Bootstrap, JQuery, React-Native, git \*\***

Truckulus ([www.truckulus.com](http://www.truckulus.com)) require an experienced and motivated mid level developer to join our new team in Aston, Birmingham, UK.

Are you an experienced Full Stack developer with a mastery of Javascript and knowledge of modern web technologies?

Are you looking for a key position as an early hire in a fast-paced, VC funded start-up where you can help create web based real-time geographical systems? This could be the perfect role for you.

You will become part of a new but growing team building a cross-platform vehicle tracking (telematics) and brokerage platform.

### **Job Description:**

As a Full Stack Developer with Truckulus you will work collaboratively on different aspects of the projects.

Your primary responsibilities will include creating a real-time, web-based geographical system using Node .js, MongoDB, and Meteor as well as a mobile system based on React Native and Javascript.

You will be responsible for maintaining and scaling these systems as well as continually improving them.

You will be a major contributor and early stage hire to the company who are developing technology that enables couriers and hauliers to track their assets and obtain extra new revenues.

### **Company Description:**

Truckulus is building a new fleet tracking and loads brokerage system using mobile technology. Our system will improve efficiency and match loads to available space. On scaling up to truckulus will save millions of kg of CO2 emissions. At Truckulus you have the ability to make a real difference optimising haulage generating profits while reducing emissions.

We offer a relaxed engaging work environment, compelling and challenging problems and great compensation.

### **Key Responsibilities:**

- Use Javascript, Meteor, MongoDB, and Node.js, on linux to create a web-based, real-time geographical system.
- Build and maintain a mobile app based on React Native and Javascript.
- Research algorithms to optimise transport plans and to match between the different transport needs of couriers/hauliers and their clients.
- Collaborate with the team to create a fast and scalable system.
- Maintain the mobile and web based systems. Take responsibility of design meetings, coding sessions, and deployment. Institute the core architecture necessary to deliver features, scalability, and performance.

### **Required Skills and Experience:**

- 3+ years of experience in Javascript
- 1+ years in Node.js
- 1+ years in Meteor & Mongo

### **Also:**

- Great communication skills that will enable you to collaborate with the team as we build it.
- Experience with Agile Development.
- Working knowledge or use of a variety of other technologies including version control (git), Linux, OSX, Android, AWS, and a variety of js libraries.

### **Compensation:**

- £30000-£35000 p.a. depending on experience
- Hours: 40 hpw (full time)
- Location: Aston, Birmingham, West Midlands, UK.

To qualify, please provide a resume/CV demonstrating the required experience and skills. There will be interviews meetings and tests.
